PENDANTS

BEAT PENDANT FAT LED

Bearing the mark of its maker, Beat is a celebration of the handmade. Inspired by the sculptural simplicity of traditional Indian water vessels, Beat is a family of hand-spun, welded and beaten lights with shades that retain hammer marks from their forming. Crafted by artisans in Northern India, the creation of Beat is part of an ancient process that takes four days to complete.

Year of Design	2005
Product Weight	1.68kg
Finishing Process	Hand Beaten, Painted, Lacquered
Surface Mount Shape/Diameter	Cone, 12.4cm
Power Method	Mains
Cable Spec	H03VV-F 2 x 0,75 mm2 PVC-PVC
Cable Type/Length	Black Fabric, 250cm
Light Source	6W LED
Max Wattage	9W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K
Dimmability	Mains Dimmable, Leading & Trailing Edge
Voltage	220-240V
Environment	IndoorIP20
Spares	LEDDISC01; LEDDRIVER01EU
Certification/Electrical Class	Certified for NZ/AUS

BRASS

Code	BLS02B-PEUM5
Shade Code	BLS02B
Shade Material	Brass
Shade Colour/Finish	Brass, Brushed
Fitting Code	LEDP15BKEU
Fitting Material	Steel
Fitting Colour/Finish	Black, Matt
Service Offer	Quick Ship

BLACK

Code	BLS02-PEUM5
Shade Code	BLS02
Shade Material	Brass
Shade Colour/Finish	Black, Brass, Matt
Fitting Code	LEDP15BKEU
Fitting Material	Steel
Fitting Colour/Finish	Black, Matt
Service Offer	Quick Ship

UNBEATEN FAT PENDANT LED

The Beat lights marked one of our earliest successes, featuring hand-hammered brass and an unexpected blend of craft detailing. Fast forward 20 years, and despite their enduring popularity, they have become one of the most widely imitated products. Determined to combat these imitations, we embarked on a novel initiative. Introducing Unbeaten, made by skilled artisans in the same factory in India as our much-loved Beat collection, with the difference being Unbeaten is made using machine tools and not hand-beaten, using premium aluminium.

Year of Design	2005
Product Weight	1.08kg
Finishing Process	Hand Spun, Hand Brushed, Lacquered
Surface Mount Shape/Diameter	Cone, 12.4cm
Power Method	Mains
Cable Spec	H03VV-F 2 x 0,75 mm2 PVC-PVC
Cable Type/Length	Black Fabric, 250cm
Light Source	6W LED
Max Wattage	9W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K
Dimmability	Mains Dimmable, Leading & Trailing Edge
Voltage	220-240V
Environment	IndoorIP20
Spares	LEDDISC01; LEDDRIVER01EU
Certification/Electrical Class	Certified for NZ/AUS

ALUMINIUM

Code	BLS02A-PEUM5

COPPER PENDANT ROUND 25CM LED

Copper is created by exploding a thin layer of pure metal onto the surface of a polycarbonate shade. This technologically advanced process of vacuum metallisation gives Copper an instantly recognisable and highly reflective surface with a warm metallic glow. The shades are created in the trademark mirrored copper, allowing clusters to be formed.

Year of Design	2015
Product Weight	1.14kg
Finishing Process	Metallised, Plated
Surface Mount Shape/Diameter	Dome, 11.5cm
Power Method	Mains
Cable Spec	H03VV-F 2 x 0,75 mm2
Cable Type/Length	Clear, 250cm
Light Source	6W LED
Max Wattage	9W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K

COPPER PENDANT ROUND 45CM LED

Copper is created by exploding a thin layer of pure metal onto the surface of a polycarbonate shade. This technologically advanced process of vacuum metallisation gives Copper an instantly recognisable and highly reflective surface with a warm metallic glow. The shades are created in the trademark mirrored copper, allowing clusters to be formed.

Year of Design	2015
Product Weight	1.98kg
Finishing Process	Metallised, Plated
Surface Mount Shape/Diameter	Dome, 11.5cm
Power Method	Mains
Cable Spec	H03VV-F 2 x 0,75 mm2
Cable Type/Length	Clear, 250cm
Light Source	6W LED
Max Wattage	9W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K
Dimmability	Mains Dimmable, Leading & Trailing Edge
Voltage	220-240V
Environment	IndoorIP20
Spares	LEDRING01Y; LEDDRIVER01EU
Certification/Electrical Class	Certified for NZ/AUS

COPPER

Code	COS02CO-PEUM2
Shade Code	COS02CO
Shade Material	Polycarbonate
Shade Colour/Finish	Copper, Mirrored

MELT PENDANT MINI LED

Melt is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing hot-blown glass effect. Melt is created through a process of blow moulding and vacuum metallisation to achieve melted orbs with abundant and unusual luminosity.

Year of Design	2014
Product Weight	1.08kg
Finishing Process	Semi-Metallised, Plated
Surface Mount Shape/Diameter	Dome, 11.5cm
Power Method	Mains
Cable Spec	H03VV-F 2 x 0,75 mm2 PVC-PVC
Cable Type/Length	Clear, 250cm
Light Source	6W LED
Max Wattage	9W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K

MELT PENDANT MINI LED

OFF

ON

Melt is a beautifully distorted pendant light now available in a new tinted white opalescent finish. By retaining Melt's organic form, we have created an opal version, which boosts its luminosity. To complement our range of metallic shades, we've introduced Opal as an alternative finish for interiors that have a more monochromatic style. Semi translucent, it maintains an ethereal ghostliness in the daylight and at night forms a perfectly illuminated orb.

Year of Design	2014
Product Weight	1.08kg
Finishing Process	Tinted, Plated
Surface Mount Shape/Diameter	Dome, 11.5cm
Power Method	Mains

Service Offer	NEW

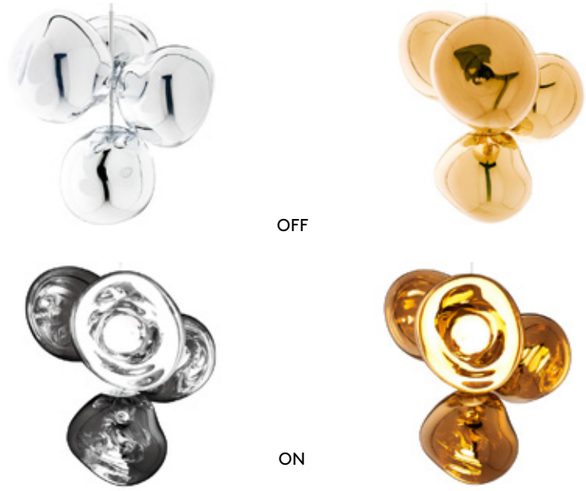
MELT CHANDELIER SMALL LED



OFF

ON

Melt is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing hot-blown glass effect. Melt is created through a process of blow moulding and vacuum metallisation to achieve melted orbs with abundant and unusual luminosity. Melt Chandelier Small features four orbs protruding from steel tubes.

Year of Design	2020
Product Weight	9.25kg
Finishing Process	Semi Metallised, Plated
Surface Mount Shape/Diameter	Dome, 25.4cm
Power Method	Mains
Cable Spec	H03VVH2-F 2 x 0,75 mm2 FEP/PVC
Cable Type/Length	Clear, 500cm
Light Source	4 x 6W LED
Max Wattage	30W
Lightsource Lumens	4 x 800
CRI	>90
Colour Temperature	3000K
Dimmability	Mains Dimmable, Leading & Trailing Edge
Voltage	220-240V
Environment	IndoorIP20
Spares	4 x LEDRING02A; 1 x LEDCDRIVER01EU
Certification/Electrical Class	Certified for NZ/AUS

MELT CHANDELIER SMALL LED

Melt Small Chandelier features four opalescent shades protruding from steel tubes and measuring one metre high. By retaining Melt's organic form, we have created an opal version, which boosts its luminosity. To complement our range of metallic shades, we've introduced Opal as an alternative finish for interiors that have a more monochromatic style. Semi translucent, it maintains an ethereal ghostliness in the daylight and at night forms perfectly illuminated orbs.

Year of Design	2020
Product Weight	9.25kg
Finishing Process	Semi Metallised, Plated, Tinted
Surface Mount Shape/Diameter	Dome, 25.4cm

PRESS PENDANT SPHERE LED

OFF

ON

Press is a series of lights made from the thickest and most transparent glass with a satisfyingly rounded linear surface detail. Aptly named Sphere, the shape is reminiscent of shipping buoys and children's toys. The ribbed glass creates diffusion of the light source and projects linear and stripy patterns. Bold in silhouette and simple in function, Press is manufactured by dropping massive globs of molten glass at 1,200 degrees centigrade, pressed in iron moulds under tons of pressure to create immensely durable lights.

Year of Design	2020
Product Weight	9.50kg
Finishing Process	Pressed
Surface Mount Shape/Diameter	Dome, 14.5cm
Power Method	Mains
Cable Spec	UL E207696 2x18AWG, 300 V, 200°C VW-1
Cable Type/Length	Clear, 250cm
Light Source	6W LED
Max Wattage	7.5W
Lightsource Lumens	800

PRESS PENDANT SPHERE FROSTED LED

OFF

ON

Press is a series of lights made from the thickest and most transparent glass with a satisfyingly rounded linear surface detail. Aptly named Sphere, the shape is reminiscent of shipping buoys and children's toys. The ribbed glass creates diffusion of the light source and projects linear and stripy patterns. Bold in silhouette and simple in function, Press is manufactured by dropping massive globs of molten glass at 1,200 degrees centigrade, pressed in iron moulds under tons of pressure to create immensely durable lights. We've introduced a beautiful new frosted finish for our best-selling PRESS family.

Year of Design	2020
Product Weight	9.50kg
Finishing Process	Pressed, Sandblasted
Surface Mount Shape/Diameter	Dome, 14.5cm
Cable Spec	UL E207696 2x18AWG, 300 V, 200°C VW-1
Cable Type/Length	Clear, 250cm
Light Source	6W LED
Max Wattage	7.5W
Lightsource Lumens	800
CRI	>90
Colour Temperature	2700K
Dimmability	Mains Dimmable, Leading & Trailing Edge
Voltage	220-240V
Environment	IndoorIP20
Spares	LEDRING11T; LEDDRIVER01EU
Certification/Electrical Class	Certified for NZ/AUS

SOFT PENDANT 45CM

OFF

ON

Showing a more neutral and understated side of Tom Dixon, SOFT emits a warm, diffused and flattering glow. Inspired by the near-spherical surface of a partially formed celestial body, SOFT is constructed from a welded steel frame and sprayed in a cocoon of diffusing material. Customise SOFT to suit your mood or setting with the use of a smart bulb, adjust the colour temperature and brightness to transform the ambience and redefine the character of the piece.

SPRING PENDANT SMALL LED

Spring features pliant ribbons of stainless steel, arranged like a whisk around a custom-made dimmable Tom Dixon LED module. Like a spring, the semi-transparent shape can be adjusted to a variety of silhouettes - from a flat spirograph, to a flying saucer, and on to a fuller pumpkin shape. The nature of the spiral design allows the voluminous shades to be easily flat packed for transportation.

STONE PENDANT LED

ON

OFF

Stone is inspired by the materiality of the same marble used to build the Taj Mahal. The hard, semi-precious stone bears a unique fingerprint – tactile, heavy and long-lasting. Stone lighting features a solid outer marble ring that appears to be floating around the light source to give out a soft halo effect.

Year of Design	2020
Product Weight	1.98kg

VOID PENDANT MINI LED

Inspired by vacuum flasks, Void is made from pure metals pressed, spun and brazed into a complex double-walled shade. Void is the result of a challenge to create a luminous pendant that mysteriously conceals its light source. A small but powerful upgraded LED module deep inside the lamp creates a soft but directional light beam, while the exterior is polished to a highly reflective finish.

Year of Design	2010
Product Weight	1.13kg

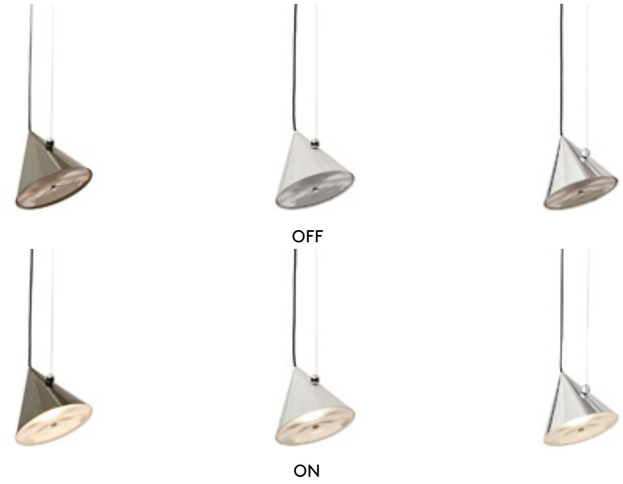
POSE PENDANT 25CM



POSE is a series of high output lamps based on conical forms that playfully explores the world of optical physics, through the world of flat lenses -often seen in lighthouses, traffic lights and in scientific instruments. With anthropomorphic charm, POSE manipulates light into focused, magnified beams with striking effect. A strong silhouette and touch of humour define its personality, while precise adjustability and high light output ensures adaptability and functionality for any space—domestic or contract. Balancing functionality with minimal design, POSE radiates light and individuality with equal brilliance

SURFACE & WALL

BEAT WALL

Bearing the mark of its maker, Beat is a celebration of the handmade. Inspired by the sculptural simplicity of traditional Indian water vessels, Beat is a family of hand-spun, welded and beaten lights with shades that retain hammer marks from their forming. Crafted by artisan in Northern India, the creation of Beat is part of an ancient process that takes four days to complete.

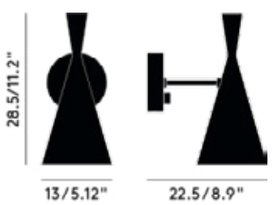
Shade Material	Brass
Shade Colour/Finish	Black, Brass, Matte
Fitting Material	Steel
Fitting Colour/Finish	Black, Matte
Service Offer	Quick Ship

Year of Design	2013
Product Weight	1.50kg
Finishing Process	Hand Beaten, Painted, Lacquered
Surface Mount Shape/Diameter	Cylinder, 11.5cm
Power Method	Mains
Light Source	E14, Light Source Not Included
Max Wattage	42W
Dimmability	Inline Dimmable
Voltage	220-240V
Environment	IndoorIP20
Certification/Electrical Class	



MELT SURFACE MINI LED

Melt is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing hot-blown glass effect. Melt is created through a process of blow moulding and vacuum metallisation to achieve melted orbs with abundant and unusual luminosity that reflects and enhances its environment.

Year of Design	2018
Product Weight	0.98kg
Finishing Process	Semi-Metallised, Plated
Surface Mount Shape/Diameter	Cylinder, 12.1cm
Power Method	Mains
Light Source	6W LED
Max Wattage	9W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K
Dimmability	Mains Dimmable, Leading & Trailing Edge
Voltage	220-240V
Environment	IndoorIP20
Spares	LEDRING01Y; LEDDRIVER01EU
Certification/Electrical Class	Certified for NZ/AUS

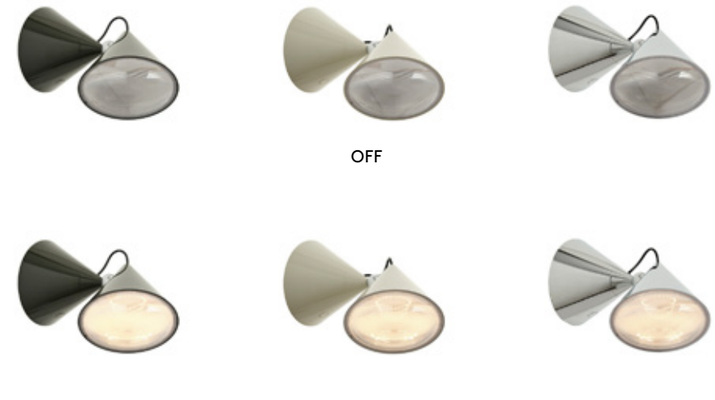
POSE SURFACE LED



POSE is a series of high output lamps based on conical forms that playfully explores the world of optical physics, through the world of flat lenses -often seen in lighthouses, traffic lights and in scientific instruments. With anthropomorphic charm, POSE manipulates light into focused, magnified beams with striking effect. A strong silhouette and touch of humour define its personality, while precise adjustability and high light output ensures adaptability and functionality for any space—domestic or contract. Balancing functionality with minimal design, POSE radiates light and individuality with equal brilliance

PRESS SURFACE LARGE LED

OFF

ON

Press is a series of lights made from the thickest and most transparent glass with a satisfyingly rounded linear surface detail. The ribbed glass creates diffusion of the light source and projects linear and stripy patterns. The metal dome cap can be interchanged depending on the customer's colour preference - silver, gold and black caps are sold with the surface lights.

Year of Design	2020
Year of Re-Design	2022
Product Weight	4.60kg
Finishing Process	Pressed
Surface Mount Shape/Diameter	Cylinder, 12cm
Power Method	Mains
Light Source	6W LED

PRESS SURFACE LARGE FROSTED LED

OFF

ON

Press is a series of lights made from the thickest and most transparent glass with a satisfyingly rounded linear surface detail. Aptly named Sphere, the shape is reminiscent of shipping buoys and children's toys. The ribbed glass creates diffusion of the light source and projects linear and stripy patterns. Bold in silhouette and simple in function, Press is manufactured by dropping massive globs of molten glass at 1,200 degrees centigrade, pressed in iron moulds under tons of pressure to create immensely durable lights. We've introduced a beautiful new frosted finish for our best-selling PRESS family. The metal dome cap can be interchanged depending on the customer's colour preference - silver, gold and black caps are sold with the surface lights.

Year of Design	2020
Product Weight	4.60kg
Finishing Process	Pressed, Sandblasted
Surface Mount Shape/Diameter	Cylinder, 12cm
Light Source	6W LED

PRESS SURFACE MINI LED

OFF

ON

Press is a series of lights made from the thickest and most transparent glass with a satisfyingly rounded linear surface detail. The ribbed glass creates diffusion of the light source and projects linear and stripy patterns. Press Mini is a new surface light which is more compact in size, lighter in weight and designed to be clustered in multiples and paired with the larger surface light. The metal dome cap can be interchanged depending on the customer's colour preference - silver, gold and black caps are sold with the surface lights.

Year of Design	2022
Product Weight	2.80kg

STONE WALL LED

ON OFF

Stone is inspired by the materiality of the same marble used to build the Taj Mahal. The hard, semi-precious stone bears a unique fingerprint – tactile, heavy and long-lasting. Stone lighting features a solid outer marble ring that appears to be floating around the light source to give out a soft halo effect.

Year of Design	2020
Product Weight	2.11kg
Finishing Process	Polished, Plated

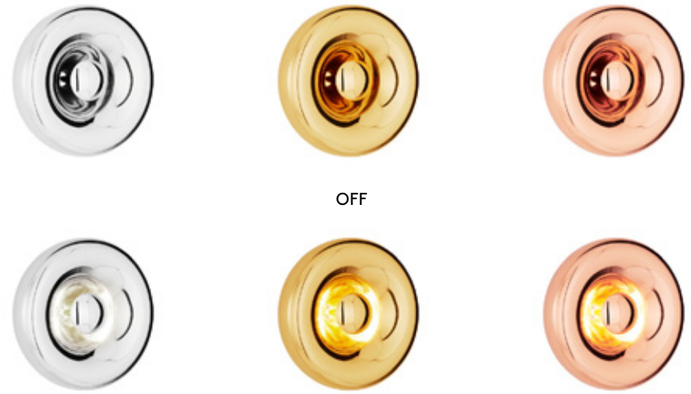
VOID SURFACE LED



OFF ON

Inspired by vacuum flasks, Void is made from pure metals pressed, spun and brazed into a complex double-walled shade. Void is the result of a challenge to create a luminous pendant that mysteriously conceals its light source. A small but powerful upgraded LED module deep inside the lamp creates a soft but directional light beam, while the exterior is polished to a highly reflective finish.

Year of Design	2020
Product Weight	2.37kg
Finishing Process	Spun, Lacquered, Plated, Powder Coated

UNBEATEN TABLE LED

The Beat lights marked one of our earliest successes, featuring hand-hammered brass and an unexpected blend of craft detailing. Fast forward 20 years, and despite their enduring popularity, they have become one of the most widely imitated products. Determined to combat these imitations, we embarked on a novel initiative. Introducing Unbeaten, made by skilled artisans in the same factory in India as our much-loved Beat collection, with the difference being Unbeaten is made using machine tools and not hand-beaten, using premium aluminium.

Year of Design	2024
Product Weight	3.43kg

BELL PORTABLE LED

OFF

ON

Taking its name from a classic dome shape, Bell is an exercise in reductionism. We're known for our metallics, so this season we're broadening our palette to include neutral colours, such as taupe, grey and white which work well in any environment. Standing out from the lot and injecting a pop of colour is the new fluoro finish. Bell Portable has a battery life of up to 9 hours.

Year of Design	2021
Product Weight	1.36kg
Finishing Process	Gloss Painted
Power Method	Rechargeable
Number of Ports	1
Battery Operating Time	Approx 6-9 hours
Battery Charging Time	5 hours
Cable Spec	AWM 2464 22AWG VW-1 1A 80 °C 300V
Cable Type/Length	USB-A to Magnetic, 200cm
Light Source	3W LED
Max Wattage	3W
Lightsource Lumens	160
CRI	>90
Colour Temperature	3000K
Dimmability	Touch Dimmable
Voltage	5V
Environment	Indoor & Outdoor, IP44 (Store inside)
Spares	LEDPB02; POBAT01; POMC01
Certification/Electrical Class	Certified for NZ/AUS

MELT PORTABLE LARGE LED

Hanging

Tripod

Melt is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing hot-blown glass effect. Introducing a new standard fitting to the series, which works across our large polycarbonate shades creating a dramatic portable light that can be used indoors and outdoors. Designed with a tripod base, this light also comes with an easy hanging strap, giving you the option to suspend from a tree or pergola. Also available with a dichroic filter accessory which channels the light of our powerful LED driver into constituent parts of the spectrum, giving the already crazed internal reflection an additional chromatic boost.

Year of Design	2024
Product Weight	2.90kg

MELT CONE SLIM FLOOR LED

OFF

ON

Melt is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing hot-blown glass effect. Melt is created through a process of blow moulding and vacuum metallisation to achieve melted orbs with abundant and unusual luminosity. Here the orb rests on a slender base, creating an elegant and intriguing silhouette.

Year of Design	2019
Product Weight	6.45kg
Finishing Process	Semi-Metallised, Roll wrapped
Cable Spec	UL E348531 2x0,75mm2, 300V, 80°C
Cable Type/Length	Black Fabric, 250cm
Light Source	6W LED
Max Wattage	7.5W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K
Dimmability	Inline Dimmable
Voltage	100-240V
Environment	IndoorIP20
Spares	LEDRING02A; LEDFC11UN
Certification/Electrical Class	Certified for NZ/AUS

COPPER

Code	MES01CO-FUN04M2
Shade Code	MES01CO
Shade Material	Polycarbonate
Shade Colour/Finish	Copper, Mirrored
Fitting Code	LEDFC11UN
Base Code	CONF04BKUN; LEDFC11UN
Base Material	Carbon Fibre, Steel
Base Colour/Finish	Black, Gloss
Service Offer	Quick Ship

SMOKE

Code	MES01SM-FUN04M2
Shade Code	MES01SM
Shade Material	Polycarbonate
Shade Colour/Finish	Smoke, Mirrored
Fitting Code	LEDFC11UN
Base Code	CONF04BKUN; LEDFC11UN
Base Material	Carbon Fibre, Steel

STONE PORTABLE LED

OFF

ON

Stone is inspired by the materiality of the same marble used to build the Taj Mahal. The hard, semi-precious stone bears a unique fingerprint – tactile, heavy and long-lasting. Stone is characterised by a solid outer marble ring that appears to be floating around the light source giving out a soft halo effect. Stone Portable LED has an integrated touch dimmer and offers up to 9 hours of battery life.

Year of Design	2021
Product Weight	2.30kg
Finishing Process	Polished, Plated
Power Method	Rechargeable
Number of Ports	1
Battery Operating Time	Approx 6-9 hours
Battery Charging Time	5 hours
Cable Spec	AWM 2464 24AWG VW-1 1A 80°C 300V
Cable Type/Length	USB-A to Magnetic, 200cm
Light Source	3W LED
Max Wattage	3W
Lightsource Lumens	160
CRI	>90
Colour Temperature	3000K
Dimmability	Touch Dimmable
Voltage	5V
Environment	Indoor & Outdoor, IP20 (Store inside)
Spares	LEDPB02; POBAT01; POMC01
Certification/Electrical Class	Certified for NZ/AUS

GOLD

Code	STPO01UN
Shade Material	Marble

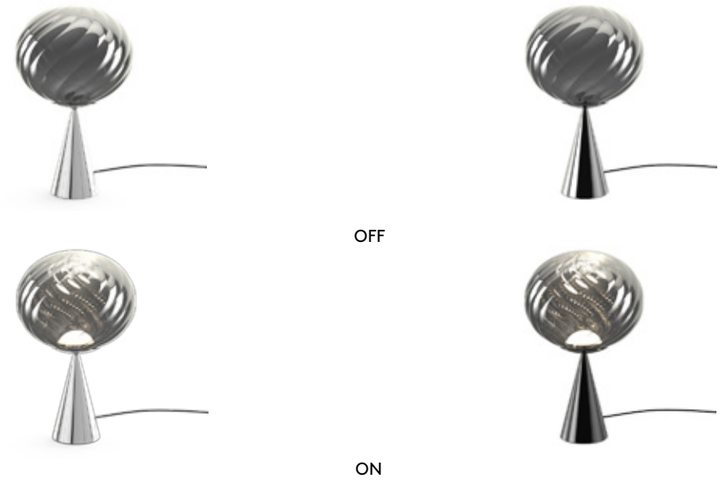
WHIRL CONE FAT TABLE LED



WHIRL is our latest experiment in mirrored reflections. Inspired by the bold elegance of the Op Art movement, WHIRL captivates with its hypnotic spiral design, transforming light and reflection into an ever-changing myriad of abstract patterns. Each piece is a statement—crafted to intrigue, designed to dazzle. Here, the orb sits above a cone shaped base, creating a striking, generous silhouette.

Year of Design	2024
Product Weight	1.94kg
Finishing Process	Semi-Metallised, Powder Coated, Plated
Cable Spec	UL E348531 2x0,75mm2, 300V, 80°C
Cable Type/Length	Black Fabric, 250cm
Light Source	6W LED
Max Wattage	7.5W
Lightsource Lumens	800
CRI	>90
Colour Temperature	3000K
Dimmability	Inline Dimmable
Voltage	100-240V
Environment	IndoorIP20
Spares	LEDRING02A; LEDTC11UN

PENDANT SYSTEM INFORMATION

Bespoke Pendant Systems
You can order a bespoke pendant system as long as your order abides by the following constraints:

Round surface mount	20kgs (44.09 lbs)
Linear surface mount	20kgs (44.09 lbs)
Mega surface mount	52kgs (115 lbs)

Round and Linear Surface Mount
Made from laser cut steel and vacuum formed plastic, the Pendant System is a mechanically engineered complete lighting solution for suspending multiple Tom Dixon lighting configurations and conceals unsightly wiring.

Maximum quantity of pendants per ceiling surface mount: 6

Mega
The Mega ceiling surface mount is made from an aluminium plate with a raw, industrial style finish, offering up to 215 hole positions. Each style can be customised by simply drilling a hole in the desired position.

Maximum quantity of pendants per ceiling surface mount: 19

Installation
To assist with installation, the surface mounts have etched hole markings with easy to follow co-ordinates, allowing for a flexible positioning of pendants within a cluster.

Detailed plans of the configurations and co-ordinates for multiple product clusters are available to download directly from the Tom Dixon website. In addition, all of our surface mounts can be primed and painted to compliment any interior environment.

LIGHTING Technical

CERTIFICATION

CE	EN 60598-1 +2	Manufacturer's declaration that the product meets EU standards for health, safety, and environmental protection. Indicates conformity in: **European Union**
IECEE	IECEE CB Scheme IEC 60598-1 +2 EN 55015 EN 61547 ENIEC61000-3-2 EN 61000-3-3	International Electrotechnical Commission conformity system, for mutual acceptance of test reports and certificates dealing with the safety of electrical and electronic products. Indicates conformity in: **All member countries of CENELEC (Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom)**
NZ/AUS	**CB + Australia & New Zealand**	The product has undergone additional CB certification and testing. Indicates conformity in: **Australia & New Zealand**
CCC	**CCC** GB7000.1 +2 GB/T17743 GB17625.1	Products covered by the China Compulsory Certification scope must comply with national standards and technical regulations. Indicates conformity in: **China**
cULus	**cULus** UL 1598 UL 153 UL 8750	The product has met UL's safety requirements for both the United States of America and Canada Indicates conformity in: **US & Canada**
FC	**Federal Communications Commission** CFR, Title 47, Part15B ICES-005	Indicates that the electromagnetic radiation from the device is below the limits specified by the Federal Communications Commission Indicates conformity in: **US & Canada**
T24	**California Title 24**	The product has been conformity assessed according to the requirements set by the California Energy Commission. (JA8 & JA10) Indicates conformity in: **California**
KC	**Korean Certification**	The product has been conformity assessed according to the requirements set by the Korean Agency for Technology and Standards. (KC) Indicates conformity in: **Korea**
Japan	**CB+Japan**	The product has undergone additional CB certification and testing. Indicates conformity in: **Japan**

ELECTRICAL CLASS (NON-UL PRODUCTS ONLY)

	**Class I** (Earthed)	Protection against electric shock is provided by an (Earthing) conductor. This prevents accessible conductive parts from becoming become live in the event of a failure of the basic insulation.
	**Class II** (Double Insulated)	Double or reinforced insulation is provided as protection against electric shock. No provision for protective earthing or reliance upon installation conditions is required.
	**Class III** (SELV)	Protection against electric shock relies on supply at safety extra-low voltage (SELV). Voltages higher than those of SELV are not generated.

IP RATING

EU / CB / CCC Version	UL Version
IP20 - Solid-object proof The minimum standard of ingress protection for lighting products. Protection against solid objects only	**Dry Location** A location not normally subject to dampness
IP44 - Splash-Proof Suitable for bathroom Zone 2 and covered outdoor areas. Not recommended to leave outdoor unattended or store outdoor.	**Damp Location** Interior or Exterior location that is periodically subject to condensation or moisture
IP55 – Jet-proof Suitable for bathroom Zone 2 and uncovered outdoor areas	**Wet Location** A location in which water or other liquid can drip, splash or flow on or against the product
IP65 – Dust-tight and Jet-proof Suitable for use and store in outdoor areas. Protected against heavy rain, splashing and light washdowns but not for submersion.	

Tom Dixon lighting is not suitable for extreme conditions such as particularly dusty environments, high salinity, acid rain or continuous direct sunlight.

Bell Fluoro: The rich, vivid colour of the fluoro finish is produced by special fluorescent pigments used in the paint. Fluorescent pigments can be sensitive to UV radiation, heat, and other environmental factors.

DIMMER COMPATIBILITY

Type	Description	Compatible with Tom Dixon Light
Leading Edge Forward Phase, TRIAC	AC Mains voltage. Original and most common household dimming method. Commonly used on incandescent lighting	Yes
Trailing Edge Reverse Phase, ELV	AC Mains voltage. Electronic dimming designed for LED lighting	Yes
0-10v	Uses a signal of 0-10V to control dimming function. Common in commercial applications.	No
DALI	Digital addressable lighting interface. Uses an additional pair of wires to digitally control each light fitting independently.	No

To make Tom Dixon Lights compatible with other dimming systems, the product may be modified, it is recommended customers consult with a Lighting Engineer. Please note any changes made to your Tom Dixon light will void any warranties.

LIGHT SOURCE GUIDE – ES

LIGHT SOURCE SELECTION GUIDE

Much of the Tom Dixon range integrates custom light sources, intended to enhance the design, performance and aesthetic of the product. In these cases, we always offer replacement light sources as spare parts which are serviceable by the customer when they reach their end-of-life.

We also offer some of our lighting as 'retro-fit' versions using commonly found lighting sockets. This allows our customer to choose the brightness, colour temperature, lamp form and dimmability to suit their preferences.

This guide is intended to assist in the selection of a suitable bulb that meets the needs of the customer. The suggestions are made by our in-house design team considering aesthetic, light output, dimmability and performance. This guide is not extensive - the customer can specify the lamp of their choice as long as the wattage is below the allowable maximum power for that luminaire.

We strongly suggest the use of LEDs over halogen lamps due to their superior energy efficiency and reduced heat dissipation.

The Tom Dixon luminaires in this document vary from Pendants, Table, Floor and Wall lights. Some are fixed to the ceiling and so can be controlled by external wall dimmers or more sophisticated control systems.

The bulbs suggested in this document have been testedwith a range of common dimmers but we recommend checking compatibility of the bulb with your specific dimming system before purchasing. Some lights in this document are portable with fixed integrated switches and dimmers. In these cases, we have suggested bulbs that we feel work best to enhance the function of the product.

Light Source suppliers:

Megaman	www.megamanuk.com
Philips HUE	www.philips-hue.com
Philips	www.lighting.philips.co.uk/
Osram	www.ledvance.com
Liquid LEDs	www.liquid-leds.com

MELT

Melt shades are manufactured of semi-metalised clear polycarbonate. As such, the light source is visible through the shade.
The light sources for Melt have been selected for their superior aesthetic and their good light output.

MIRRORBALL

Intended to be used as a spot light, the Mirroball range has a clear window with a small aperture at the bottom of the shade. As such, some of the suggested light sources emit tight beams of light to concentrate the light down onto a surface.

COPPER

Similar to Mirrorball, the Copper range has a cutout at the bottom of the shade which allows unadultered light to pass through the aperture. As such, some of the suggested light sources emit tight beams of light to concentrate the light down onto a surface.

COPPER Ø25CM

* Dimmable through free proprietary application

WHIRL

Similar to Melt, the Whirl range is manufactured from semi-metalised clear polycarbonate. The light sources for Whirl have been selected for their superior aesthetic and their good light output. When clustering together, we recommend pairing bulbs from the same supplier.

WHIRL Ø30X25CM

Max Wattage	Ref.	Power (W)	Socket	Lumens (lm)	Dimming	Brand	Product Name	Product Number

SOFT

The lampholder for the Soft range is hidden inside the shade. As such the bulbs suggested below focus more on performance than aesthetic. As the shade is diffusing, the colour temperature of the lamp is an important consideration. It should be noted that the opening for the lamp holder for the 60cm shade is only 8cm in diameter so a suitable bulb size should be selected.

SOFT Ø45CM

Max Wattage	Ref.	Power (W)	Socket	Lumens (lm)	Dimming	Brand	Product Name	Product Number

BEAT

The Beat Wall light incorporates an integrated rotary dimmer. This selection of bulbs are compatible with this dimmer. The suggested bulbs below are all 'candle' shaped E14 lamps as this thinner form is easier to place inside the shade and maximises light output.

SLAB LOUNGE CHAIR

Celebrating the natural beauty of timber - Slab has generous proportions, solid materiality and is softened with a gently radius edge. The surface is deeply brushed to expose its natural grain. What was missing from the Slab range was a low lounger to support the family of tables, chairs and stools. The new Slab Lounge is a more designer graphic outcome made of solid oak or ash, with an oval seat pad upholstered in select fabrics. Slab Lounge can also be paired with a matching ottoman.

TABLES

FLASH TABLE CIRCLE

In true glam-rock fashion, Flash is part of our continued quest to create an ultra-reflective, theatrical surface which mirrors its surroundings. The tables in the family come in different finishes with a mirrored glass surface. Flash are moody singular statements that can be nested together as a three-tiered multi-level coffee table. Flash Table Circle is the mid-height table in the family.

FLASH TABLE RECTANGLE

In true glam-rock fashion, Flash is part of our continued quest to create an ultra-reflective, theatrical surface which mirrors its surroundings. The tables in the family come in different finishes with a mirrored glass surface. Flash are moody singular statements that can be nested together as a three-tiered multi-level coffee table. Flash Table Rectangle is the tallest table in the family.

Year of Design	2009

GROOVE OBROUND TABLE

Groove, Tom Dixon's highly anticipated outdoor collection is a family of furniture that's been more than 10 years in the making. Crafted from durable aluminium, Groove is corrosion-resistant and built to withstand all weather conditions. The collection, with its distinctive art-deco inspired ridges, is available in two shades — Moss and Putty — designed to offer timeless elegance that fits effortlessly into any outdoor setting.

Year of Design	2025
Product Weight	25.65kg
Environment	Outdoor
Certification	BS EN 581-1:2017, BS EN 581-3:2007

SCREW CAFE TABLE 60CM/24IN

Inspired by a rotating sculptor's table, Screw uses typical reinforcement details, like a piece of traditional workshop equipment. In a nod to London's industrial past, Screw is also made with materials and processes associated with the Industrial Revolution. Its rotating top on a threaded steel pole allows for adjustable height, while being sturdy and durable.

Year of Design	2007
Product Weight	33.00kg
Environment	Indoor
Certification	BS EN 15372: 2016 Level 2

SLAB DESK 120CM/48IN

Celebrating the natural beauty of oak, Slab is constructed in angular forms of inviting simplicity. Each piece has generous proportions, solid materiality and is softened with a gently radius edge. Slab is made from solid oak, left unbrushed for a smooth writing surface. For Slab Desk the traditional inkwell is turned into a cable management hole and a groove for stationery.

STONE TABLE RECTANGLE

A smartly detailed side table in a rectangular form. The Stone Table is available with a glossy black base and a stone top made of colourful marble mined from the Shandong and Fujian provinces of China. The pattern of the natural marble is due to the crustal movement changes in the process of lava extrusion, developed over millions of years.

FAT STOOL 75CM STEEL

Fat is designed to hug the body and allows for multiple sitting positions. Fat is made from moulded foam, wrapped in upholstery by experienced craftsmen, and is available with metal legs in high gloss black lacquer. The iconic Fat silhouette, a Tom Dixon best-seller, is now lighter and more streamlined. Ideal for home offices, workspaces, dining rooms and restaurants, catering to the hybrid lifestyle of work and play. Engineered for contract and residential use.

FAT WORK

Fat Work was inspired by Tom taking home an office chair during Covid, which lasted only two days because he didn't like its aesthetic, and it didn't fit into his domestic interior environment. This dissatisfaction prompted him to design his own perfect home office chair, giving birth to Fat Work. Made in Europe, it is a true statement piece of supreme comfort. The first time Tom has put wheels on his furniture, Fat Work is height adjustable with a five-star base and engineered to support great posture.

FAT SOFA OTTOMAN

This year, Tom Dixon extends the best-selling Fat collection's design principles to sofas. Designed for utmost comfort, perfect for relaxing at home or in social spaces. The Fat sofas act as a central, inviting 'living island' in any environment, enhancing both aesthetics and functionality. The fully modular system allows for endless configurations, adapting to various spaces and needs, making it easy to create unique, personalised set-ups.

PLUMP SOFA OTTOMAN

Plump is well-rounded and plush, with an implied squidginess that enhances comfort. It offers flexible configurations and is easy to move. The minimalistic design allows Plump to blend seamlessly with any interior style. The reference point for the design is the Chesterfield, a traditional English typology that has remained a British classic for centuries. Tom aimed to create something reminiscent of that in terms of proportions but with a distinct departure in appearance.

PLUMP 2.5 SEATER SOFA

Plump is well-rounded and plush, with an implied squidginess that enhances comfort. It offers flexible configurations and is easy to move. The minimalistic design allows Plump to blend seamlessly with any interior style. The reference point for the design is the Chesterfield, a traditional English typology that has remained a British classic for centuries. Tom aimed to create something reminiscent of that in terms of proportions but with a distinct departure in appearance.

WINGBACK MICRO CHAIR

Wingback is a nod to 17th century English wingback and balloon back archetypes, re-thought and updated for the 21st century. Its recognisable silhouette with expressive sweeping curves is formed through a hard sculptural foam shell, concealing a steel frame with a modelled plywood base. It is then covered with cut foam and given a pocket-sprung seat cushion for maximum comfort.

SOFA CONFIGURATION

***The PLUMP and FAT sofas ARE NOT available to be upholstered in leather**

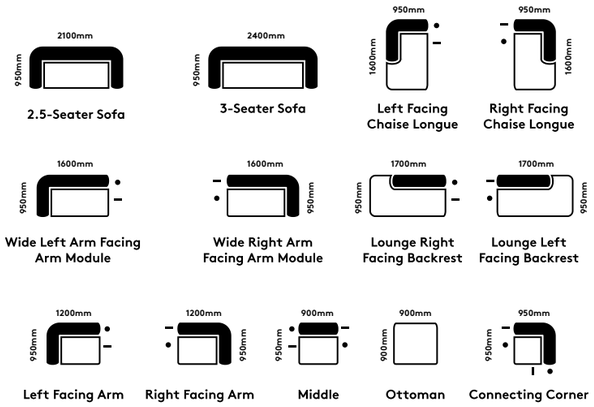
PLUMP SOFA

Tom says: *'The reference point is the Chesterfield, a traditional English typology that has remained a British classic for centuries. We aimed to create something reminiscent of that in terms of proportions but with a distinct departure in appearance.'*

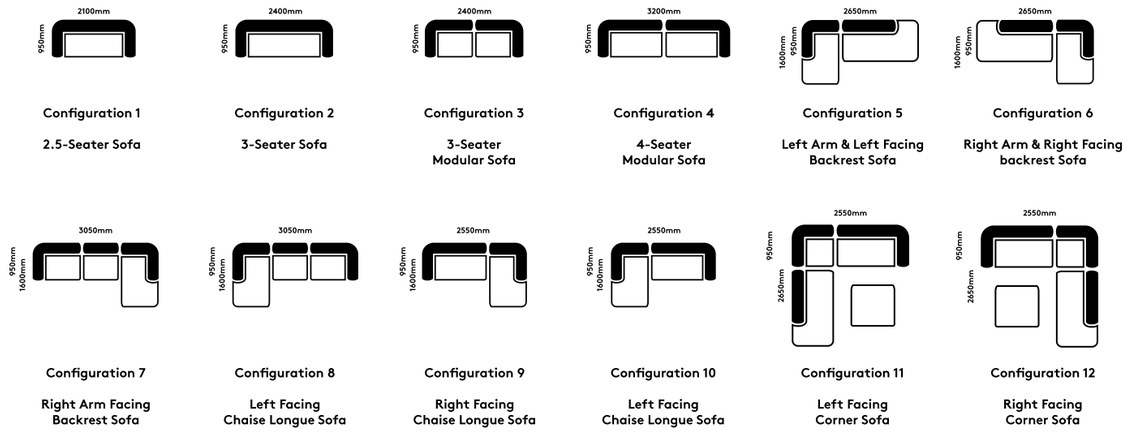
PLUMP is well-rounded and plush, with an implied squidginess that enhances comfort. It offers flexible configurations and is easy to move. The minimalistic design allows PLUMP to blend seamlessly with any interior style.

All modules can be connected via alligator clips which are pre mounted at the base of each module. The clips are discreetly tucked underneath when not in use. Modules can be combined following the illustrations below.

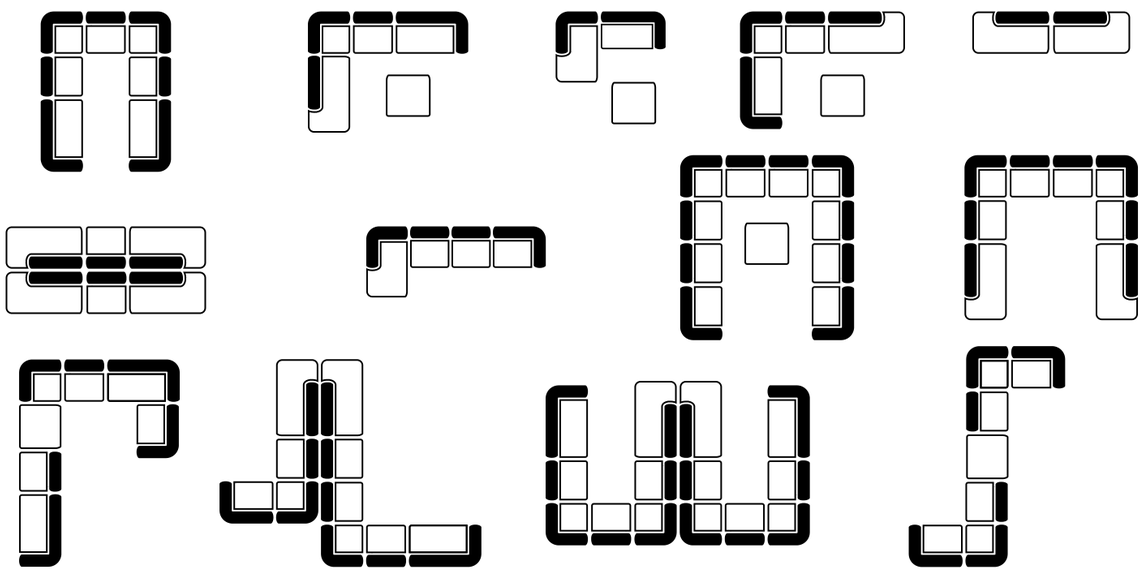
Seat height: 40cm **Arm height: 70cm**



Best Selling Sofas & Configurations



Infinite Possibilities



FAT SOFA

Extends the best-selling FAT collection's design principles to sofas. Designed for utmost comfort, perfect for relaxing at home or in social spaces.

Acts as a central, inviting 'living island' in any environment, enhancing both aesthetics and functionality. The fully modular system allows for endless configurations, adapting to various spaces and needs, making it easy to create unique, personalised setups.

All modules can be connected via alligator clips which are pre mounted at the base of each module. The clips are discreetly tucked underneath when not in use. Modules can be combined following the illustrations below.

SLAB FINISHES GUIDE

Celebrating the natural beauty of oak or ash, the Slab collection is a robust piece constructed in angular forms of inviting simplicity. Each piece has generous proportions, solid materiality and is softened with a gently radiused edge. The Slab family is made from solid oak or ash, sourced from sustainably managed forests. The surface of the wood is deeply brushed to expose the grain, available in a natural finish, a black lacquer or fumed oak.

Due to the nature of wood, each piece is unique and grain variations can be seen within the surface of the same product. This is a natural property of wood and is to be expected.

Our Slab Tables, Chairs, Stool and Ottoman have a brushed surface and can appear slightly different when side to-side.

Our Slab Desks have a non-brushed surfaces to allow use as a writing desk, but can still have a slight texture and will vary from product to product.

All Slab products are finished with a matte lacquer to help protect the surface finish. Due to wear and tear or misuse, scratches or marks can occur in the black paint. Always protect wood surfaces from heat sources and sharp objects, and wipe up spills immediately. A black touch-up pen can be ordered from customerservices@tomdixon.net

TOM DIXON BOUCLE

This selection of boucle fabrics was chosen for its soft, voluminous and elegant characteristics. Boucle combines polyester and polyacrylic yarns, which have been twisted and spun to create a beautiful upholstery fabric. Made first by creating loose loops around a core yarn, bouclé yarns are a popular choice in furniture fabrics, as they are suitable for loose covers and easily upholstered on tight fitted models. The texture of boucle is formed by the varying size of loops, from large and loose curls to small and tight circlets.

AUTUMN

Autumn is an upholstery textile woven from 100% recycled polyester. It comes in a nuanced colour palette designed by Teruhiro Yanagihara, inspired by the transient nature of the ‘ageing season’.

The textile is constructed with a recycled polyester yarn made from used plastic bottles and woven in a layered double-beam weave. This composition gives Autumn a soft, natural hand and allows it to be continuously recycled with no degradation in quality.

A dark, unicoloured background is used across Autumn’s colour palette, and offers a rich contrast to the melange top layer, which features yarns created from a mix of two fibre-dyed colours. The scale comprises a selection of neutrals including a white melange, papery beige notes and greys, and characterful reds, blues, and oranges, alongside a lively black shade.

Teruhiro Yanagihara: “I chose a soft gradation of colours to represent the richness of ageing. I felt that although the textile is made of 100% recycled polyester, it expresses the sensitivity and transience in nature and a sense of natural fibres.”

Autumn is suitable for a wide range of commercial and residential applications.

For more information visit Kvadrat Autumn

HALLINGDAL 65 (CATEGORY 2)

HALLINGDAL 65

NANNA DITZEL

Kvadrat's first textile Hallingdal has become the archetype of woollen textiles. The very durable upholstery fabric was originally designed in 1965 by Nanna Ditzel who is known as one of Denmark's great designers. Hallingdal 65 is made of wool and viscose: the wool provides excellent durability and flexibility, whilst the viscose adds brilliance and depth to the colour. Both materials are dyed before they are spun, which highlights the rich texture of the fabric. The versatile palette includes neutral and strong, primary colours. Some colourways are unicoloured, others are constructed from 2 different unicoloured yarns, and the rest are created using unicoloured yarns in combination with melange yarns.Hallingdalhas been continually produced by Kvadrat since the company was established and it remains one of the best selling textiles of the Kvadrat collection.

For more information visit Kvadrat Hallingdal 65

Type	Upholstery
Composition	70% new wool, 30% viscose
Yarn Type	Woolen
Binding	Plain
Width	Approx. 130 cm (Approx. 51")
Weight	795 g/m² (25.64 oz/sq ft)
Repeat	None
Cleaning	Vacuum clean frequently, ideally every week. Remove stains as soon as they occur, with clean warm water or sparkling water. Extraction clean when necessary. Extraction cleaning might dissolve water-based glue. Pay attention to temperature and amount of cleaning fluid.
Abrasion	Approx. 100.000 Martindale rubs, EN ISO 12947

HERO 2

PATRICIA URQUIOLA

Unicoloured Hero 2 is a full-bodied upholstery textile designed by Patricia Urquiola. A new iteration of Hero, it is characterised by its soft texture and exceptional colour richness, and comes in a sporty new palette comprising over 30 nuances.

Hero 2 exemplifies Kvadrat's commitment to Conscious Design Principles. It is primarily woven from wool, a renewable resource, and is re-engineered to contain recycled nylon instead of virgin nylon. Consequently, it is suitable for recycling.

The expansive new palette for Hero 2 showcases Patricia Urquiola's singular approach to colour design. It comprises a dynamic scale of subtle yet vibrant hues inspired by nature that explore tonal associations, including a series of non-traditional interpretations of red.

For more information visit Kvadrat Hero 2

Type	Upholstery
Composition	97% new wool, 3% recycled nylon

TOM DIXON LEATHER

Slightly corrected semi-aniline leather is a lightly sanded leather that is supple and soft, with an elegant look. The leather may be lightly printed or retain its natural grain, which is slightly stronger than with full-grain semi-aniline leather. Sitting comfort remains high, as the ability of the leather to breathe is partially preserved. This type of leather is a good choice for both homes and the contract market. A warm, soft and inviting leather, with high durability and a flexible structure.

For more information visit Camo Leather

Composition	Leather
Average size	4.2 m2
Thickness	0.9-1.1 mm

DIVINA MELANGE 3

FINN SKÖDT

Divina Melange 3 is a vibrant piece-dyed woollen upholstery textile reminiscent of felt. Cheerfully simple, it comes in a fresh, versatile palette by artist and designer Finn Sködt.

Compact, comfortable and extremely smooth, Divina Melange 3 expresses colours and the shape of furniture particularly well. It is constructed by weaving the yarn in a simple binding after which it is subjected to pressure and high temperatures. This milling process, which is often associated with fine tailoring, transforms the material from coarse to a soft and uniform, felt-like surface.

Produced by piece-dyeing a dark or light grey melange, the textile's colour palette perfectly reflects Finn Sködt's pure aesthetic. The new colour scale combines signature nuances, such as hot pink, forest green and Finn Sködt's favourite ultramarine, together with chalky notes and neutral shades. These are meticulously picked from the designer's extensive colour library of hand-painted samples, documenting the colours that he has used in his paintings for decades.

Unlike previous editions of Divina Melange, the new colourways go beyond pairs of light and dark versions of the same colour. Instead, they combine pairs of complimentary yet different tones to deliver a greater degree of diversity.

Divina Melange 3 is versatile and hard-wearing. Consequently, it is suitable for both public and private spaces alike.

For more information visit Kvadrat Divina Melange 3

Type	Upholstery
Composition	100% new wool
Yarn Type	Woolen yarn

MELANGE NAP

AKIRA MINAGAWA

Melange Nap is a woollen upholstery textile characterised by exceptional depth of colour and surprising details. Designed by Akira Minagawa, it offers a distinctively unique melange expression.

Extremely soft yet durable, Melange Nap appears to be brushed. It is constructed with a unicoloured and a melange yarn, which creates a graphic pattern of tiny dots that play across its surface.

The volume of details that emerges from the surface of Melange Nap depends on the contrast between the yarns. Some of the darker colourways almost appear unicoloured whereas others have an intriguing multi-coloured look.

Akira Minagawa: 'Melange Nap transforms an interior into 'scenery' within its space. The colour compositions are inspired by six elements from the natural world: Forest, Sun, Ocean, Minerals, Earth, and Dune. Each expression of the textile harmonises with its surroundings in an individual way, while creating a sense of the peace that comes from nature.'

Suitable for public and private spaces, Melange Nap comes in a number of colours derived from upholstery textile Forest Nap, also designed by Akira Minagawa. Consequently, they combine particularly well.

For more information visit Kvadrat Melange Nap

Type	Upholstery
Composition	97% new wool, 3% nylon
Yarn Type	Worsted spun
Binding	Plain
Width	Approx. 140 cm (Approx. 55")
Weight	440 g/m² (14.19 oz/sq ft)
Repeat	None
Cleaning	Vacuum clean frequently, ideally every week. Remove stains as soon as they occur, with clean warm water or sparkling water. Extraction clean when necessary. Extraction cleaning might dissolve water-based glue. Pay attention to temperature and amount of cleaning fluid.
Abrasion	Approx. 60.000 Martindale rubs, EN ISO 12947
Pilling	Note 3-4, EN ISO 12945
Lightfastness	Note 6-7 ISO 105-B02

ELLE

SAHCO

A curled bouclé fabric, Elle drapes and curves around furniture like an elegant designer coat. The spun bouclé yarn created by blending wool, viscose and acrylic gives the surface a soft tactility. During the subsequent dying the yarns take the colour differently, creating captivating shifts within the same tones. This effect and a slight sheen from the acrylic blend bring life to the voluminous textured bouclé surface. Elegant neutrals range from oyster, coffee, pearl white, light ivory and caramel to cactus green, concrete grey, nutmeg, mud brown and ink. Taking cues from fashion, brighter contrast colours are sunset orange, rust, plum and aqua.

For more information visit Kvadrat Elle

Type	Upholstery
Composition	20% polyacrylic, 15% polyamide, 20% viscose, 20% wool, 25% cotton
Yarn Type	Staple / Filament
Binding	Jacquard
Width	Approx. 140 cm (Approx. 55")
Weight	900 g/m² (29.03 oz/sq ft)
Repeat	None
Cleaning	Vacuum clean frequently, ideally every week. Remove stains as soon as they occur, with clean warm water or sparkling water. Extraction clean when necessary. Extraction cleaning might dissolve water based glue. Pay attention to temperature and amount of cleaning fluid.
Abrasion	Approx. 70.000 Martindale rubs, EN ISO 12947

GENTLE 2

FEBRIK

Gentle 2 is the only knitted stretch velvet upholstery textile on the market. Designed by Febrik, it comes in a refreshed colour scale and combines an inviting presence with a sumptuous, soft pile.

The textile is constructed by knitting loops through a base layer and subsequently shearing the surface. Thanks to a subtly striated surface which derives from the naturally irregular thicknesses of the woollen yarns, Gentle 2 features a rich surface with an elegant shine.

Gentle 2 has a particularly opulent feel as it is laminated onto a 2mm thick base foam. This ensures the textile stands out with a voluminous expression that sets it apart from traditional woven velvets.

The updated colour palette neatly compliments Gentle 2's soft, comfortable expression. It comprises light pastels and clear bright hues, such as lavender, cream, tangerine and electric blue.

Suitable for public and private spaces, Gentle 2 offers excellent stretchability due to its knitted construction. Consequently, it clings to curves in a particularly elegant way and is ideal for upholstering organic shapes, as well as any other form.

For more information visit Kvadrat Gentle 2

Type	Knitted upholstery
Composition	60% wool, 20% polyamide, 20% polyester, 2 mm foam
Yarn Type	Worsted

kvadrat

CUSTOMERS OWN MATERIAL (COM) AND CUSTOMERS OWN LEATHER (COL)

In addition to our selection of fabrics, we have a list of pre-approved Fabrics (COM) and Leathers (COL) to choose from.

Please contact customerservices@tomdixon.net for a full list of pre-approved fabrics and leathers and the COM/COL ordering process.

Fabric/Leather Suitability
It is the responsibility of the Customer to ensure the selected material is suitable for the intended environment. Tom Dixon cannot take any responsibility for the performance of the material or any improper use. It is the responsibility of the Customer to ensure they follow the Care & Maintenance guidelines provided by the manufacturer. Seek further advice from the fabric supplier where required.

Guidelines for Domestic Use
Fabrics must be match resistant. It is the responsibility of the Customer to advise if the COM or COL fabric supplied is inherently match resistant or will need chemical flame retardant treatment. The upholstery composite (lay up of fabric cover, any interlines and the filling assembly) must be cigarette resistant. It is the responsibility of the Customer to advise if the COM or COL material supplied is inherently cigarette resistant or will need chemical flame retardant treatment.

Guidelines for Contract Use
The fabric cover and upholstery composite must be match resistant and cigarette resistant. In addition, the upholstery composite must be larger flame source resistant, depending upon the environment the upholstery is placed into. It is the responsibility of the Customer to advise the specific non domestic usage requirements and to advise that the COM or COL fabric supplied meets the requirements. Any other regional requirements will need to be agreed in advance of order placement. All test certificates must be sent to Tom Dixon for approval in advance of order placement and confirmation. For lead times on colours not included in the collection fabrics, please reach out to Customer Services or your Trade Services Executive.

*The PLUMP and FAT sofas ARE NOT available to be upholstered in leather.

To comply with various country regulations on upholstery fire safety, Tom Dixon offers two types of upholstery foam: CMHR (Combustion-Modified High Resilience which contains added fire-retardant chemicals) and HR (High-Resilience without added fire-retardant chemicals). Fixed coverings (fabric & leather) must also comply with upholstery fire-safety regulations, depending on end-use setting.

End-use setting should be checked with the customer when specifying. If further clarification on our foams and fabric offer is required, please contact customerservices@tomdixon.net

The below matrix sets out the foam requirements in conjunction with our fabric collection for selected end-use settings. “Rest of World” (RoW) refers to countries outside of the UK and USA.

APPENDIX

Design Research Limited t/a Tom Dixon (the Company) agrees to sell its goods on the following terms:

1 PRICING TERMS

1.1 This price list is valid from 1 December 2025 and supersedes all previous lists.

1.2 Prices are provided for indicative purposes only, and are based on economic conditions and the best knowledge of the Company at the time of publication. The Company reserves the right to change list prices at any time and on any product without prior notification.

2 WARRANTIES

2.1 This Contract constitutes the entire agreement between the Company and its customers (the Customer) for the sale of Goods. The Customer acknowledges that it has not relied on any statement, promise, representation, assurance or warranty made or given by or on behalf of the Company which is not set out in the Contract.

2.2 Any samples, drawings, descriptive matter, or advertising produced by the Company and any descriptions or illustrations contained in the Company's catalogues or brochures are produced for the sole purpose of giving an approximate idea of the Goods described or depicted in them. They shall not form part of the Contract or have any contractual force.

2.3 The Customer shall be responsible for inspecting Goods upon delivery and it is a condition of the Contract that any shortage or defect in Goods at delivery is notified to the Company in writing together with photographic proof within 5 Working Days from the receipt of Goods.

2.4 A three-year limited warranty against manufacturing defects is offered on all furniture and lighting Goods (materials and construction). A one-year limited warranty against manufacturing defects is offered on all other Goods. Normal wear on fabrics and finish, as well as indirect damage to persons or articles is not covered by this warranty. Where a defect has been notified, the Customer will, if so requested by the Company, return the Goods to the Company at the Customer's expense. If the Company subsequently confirms that the returned Goods contain defects attributable to the Company, the reasonable costs of re-delivery incurred by the Customer will be refunded.

2.5 The warranties given above will not apply to defects that are due to fair wear and tear, accidental damage or failure by the Customer or any third party to adhere to the Company's instructions or written recommendations.

2.6 Any modifications made to the product by the Customer will void the warranty.

3 INSTALLATION

3.1 All the company's lights are for indoor use only unless otherwise specified. They should be installed by a qualified electrician. Installation must be carried out in accordance and compliance with current building regulations.

3.2 Because of the variety of different ceiling types and construction the Company cannot advise on fixings. The Customer should check the type of ceiling construction they have and use appropriate fixings that are suitable for the weight of the light being installed.

3.3 Please note replacement bulbs should be in accordance with recommendations in the product instructions.

4 PRICING

4.1 Prices charged will be the current list price on the day on which the purchase order is placed unless otherwise stated in writing by the Company. The Company reserves the right to change list prices at any time and on any Goods without prior notification.

4.2 Quotations provided by the Company shall be valid for 30 days only. Any purchase orders placed before a change to the price list is published must be collected or delivered in full within 15 days of the order failing which the order will be cancelled.

4.3 Unless otherwise stated in the Contract, prices are quoted exclusive of value added tax and sales tax, carriage and freight which will be payable in addition. The Company accepts no responsibility or liability for any taxes, duties, delivery fees or other fees which the Customer may be required to pay in relation to the Goods, and the Customer shall be solely responsible for paying any such required fees or taxes.

5 ORDERING

5.1 All Customer orders, other than for made-to-order items, are to be placed via the Tom Dixon Trade Portal (www.tomdixontrade.net).

5.2 Where requested, certificates of origin can be provided at the Customer's expense, for a fee of €100, $120, $120 (USA & Asia) whichever is applicable.

5.3 All orders placed with the Company are picked and dispatched on an individual basis. Unless otherwise agreed between the parties, the Company shall not facilitate the consolidation of customer orders.

5.4 Orders will only be considered placed once a formal receipt of confirmation of order has been provided by the Company (Order Confirmation). Order Confirmation is final and binding. Any subsequent change or cancellation is subject to the Company's consent.

6 SHIPPING AND HANDLING CHARGES

Shipping fees are based on the order value as outlined in Table 1A and Table 1B.

TERMS AND CONDITIONS

TABLE 1A

Region	Details	Currency	Minimum Order Size	Shipping/handling fee if below MOS
UK	Deliveries within the UK	Pound Sterling	€1,150	€95
Europe	Deliveries within the European Union	Euro	€1,350	€135

*Shipping fee charges apply from 1 December 2025

TABLE 1B

USA	Zone States	Shipping Charge
Parcel/Ground Shipping Charge	Under $150.00 $150.00 - $1,000.00 Over $1,000.00	$15.00 $35.00 $95.00
Freight Shipping	Under $2,000.00 $2,000 - $5,000.00 $5,000 - $10,000.00 Over $10,000.00	$200.00 10% of Retail Value 8% of Retail Value 5% of Retail Value, max $2,000.00
White Glove	Additional $100.00 + Freight Fee	

*Shipping fee charges apply from 1 December 2025

7 DELIVERIES

7.1 The Company shall make all reasonable efforts to deliver all Goods within the period stated in the Confirmation of Order, however such periods are stated for indicative purposes only. The Company shall not bear any liability for any delay in delivery, and time shall not be considered of the essence in this regard.

7.2 For stocked Goods, the Company aims to deliver within 7 Working Days within the UK, and within 10 Calendar Days across the EU and 10 working days across the United States.

7.3 All items are stocked Goods, unless otherwise indicated. For non-stocked Goods, specific lead times may be specified next to the product in this price list and the Tom Dixon Trade Portal.

7.4 The Company only delivers to commercial addresses. Each account holder may register up to three commercial addresses with the Company. For shipments to any other commercial addresses, where applicable (Drop Ship) or orders below the MOS, an additional Drop Ship administration fee will be charged by the Company. This fee shall be €100 in the UK and $120 in the EU.

8 EX-WORKS ("EXW") AND CUSTOMER'S OWN ACCOUNT ("COA") SHIPPING, HANDLING AND ADMINISTRATIVE CHARGES

8.1 All Customers outside the EU, and the United States must collect orders on EXW terms, as defined by the Incoterms® rules in force from time to time.

8.2 All export documentation (including commercial invoices and delivery notes) will be supplied by the Company. All carrier correspondence and collections shall be arranged exclusively by the Customer, at the Customer's risk and expense.

8.3 For orders below the EXW MOS, an EXW handling fee will be charged as set out in Table 2.

8.4 All EXW collections must take place within a defined pick-up period, or incur a daily handling fee, as outlined in Table 2.

8.5 EXW Orders not picked up within 10 Working Days from the collection date notified to the Customer from the UK or United States warehouses will be subject to a daily storage fee commencing on the 11th Working Day from the collection date as set out in Table 2. Orders not picked up within 20 days from the initial collection date will be restocked and a restocking fee charged as set out in Table 2.

8.6 The Company shall bear no responsibility or liability for any loss or damage incurred during transit by EXW carriers. Orders must be checked by the Customer upon collection.

8.7 For orders below the Customer's Own Account (COA) minimum order size, a COA handling fee will be charged as set out in Table 2.

8.8 Any shortages or damages must be reported by the Customer to the Company within 5 Working Days of delivery and accompanied with photographic evidence.

TABLE 2

Region	Currency	EXW Minimum Order Size	Handling fee	Pick up period (business days)	Daily storage fee per pallet per day	Restocking fee
Ex-works DK warehouse	Pound Sterling	€1,400	€100	5	€20	25%
Ex-works DK warehouse	Euro	$2,000	$100	5	$25	25%
Ex-works US warehouse	US Dollar	$2,000	-	10	$25	25%
COA US warehouse	US Dollar	$1,500	-	-	-	25%

1 PAYMENT TERMS

1.1 30 Day Terms: If there is sufficient available credit on a Customer's account, Orders will be dispatched as soon as practicable and, unless agreed otherwise in writing, all invoices issued by the Company shall fall due 30 days from date of invoice.

1.2 Proforma Terms: Full payment of proforma invoices must be received by the Company in the form of cleared funds within five Working Days of receipt of the proforma invoice. Goods will be dispatched only upon receipt of payment in full from the Customer. The Company reserves the right to unreserve stock if a proforma invoice remains unpaid after 15 Working Days of receipt of the invoice.

1.3 It is the sole responsibility of the Customer to verify the specification of made-to-order Goods as outlined in the Order Confirmation provided to the Customer.

1.4 If a made-to-order item meets the specification agreed to in advance on the Order Confirmation, such Goods may not be returned or exchanged under any circumstances.

1.5 Invoices that are not disputed within 20 days of invoice date are conclusively deemed accurate.

1.6 Customer shall pay the undisputed portion of the fees promptly and provide written details specifying the basis of any dispute, to the reasonable satisfaction of the Company.

1.7 For non-stock (made-to-order) items, a non-refundable 50% deposit shall be payable at point of Order for Proforma Terms, and a written confirmation of the Order is required, prior to the commencement of manufacture, unless otherwise agreed.

2 PROPERTY AND RISK

2.1 Save where otherwise agreed or specified in this Contract, the risk of loss or damage to the Goods passes to the Customer upon delivery.

2.2 Any Goods delivered to the Customer remain the property of the Company until payment in full of all amounts due to it from the Customer have been received by the Company.

2.3 Subject to clause 10.4, where Goods have been provided on credit terms, the Customer may resell or use them in the ordinary course of its business (but not otherwise) before the Company receives payment for the Goods. However, if the Customer resells the Goods before it has paid the Company for them in full:

(a) it does so as principal and not as the Company's agent; and
(b) title to the Goods shall pass from the Company to the Customer immediately before the time at which resale by the Customer occurs.

2.4 If, before the Customer has paid the Company for any Goods, an event of default occurs as listed in clause 15, then:

(a) the Customer's right to resell the Goods as set out in clause 10.3 ceases immediately: and
(b) the Company may at any time:
  (i) require the Customer to deliver up all Goods in its possession which have not been resold; and
  (ii) if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where such Goods are stored in order to recover them.

2.5 If ten Working Days after the day on which the Company notified the Customer that the Goods were ready for delivery the Customer has not accepted delivery of them, the Company may resell or otherwise dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Customer for any excess over the price of the Goods and/or charge the Customer for any shortfall below the price of the Goods, at the Company's election in its sole discretion.

3 RETURNS

3.1 The return of all Goods needs to be preauthorised by the Company.

3.2 All returns will be at the Customer's expense unless the Goods are faulty.

3.3 No returns will be accepted after 28 days from the invoice date.

3.4 Made-to-order items may not be returned unless they are faulty or not as described.

3.5 All returned Goods that are not faulty should be in their original unopened packaging and fit for resale. The Company will not refund Goods whose packaging is opened and/or which are not fit for resale in the Company's opinion.

4 SPARE PARTS

The Company may, in its sole discretion, hold a selection of spare parts for discontinued products for a limited period from the date of issued product discontinuation, but shall have no obligation to do so.

5 UNEXPECTED EVENTS

If the Company is prevented from carrying out its obligations to the Customer by a cause beyond its reasonable control, including fire, flood, storm, failures of sub-contractors or transport, industrial action, epidemic or pandemic, or acts of God, including without limitation any COVID-19 related disruption, the Company shall not be liable for any failure or delay.

6 TERRITORY AND INTERNET SALES

6.1 A Customer who wishes to market and sell the Goods digitally or online may only do so where they hold stock of the Goods to be sold, or they display the Goods in a physical, bricks and mortar showroom or retail space which is accessible to the public during normal working hours.

6.2 The use of the Company's trademarks and other intellectual property in marketing, digitally or otherwise, including Online Advertisements (as defined in 14.3 below), is strictly prohibited without the Company's express permission in writing, and in all cases must adhere to the Company's Online Brand Guidelines as published on the Tom Dixon Trade Portal from time to time.

6.3 The Customer shall refrain from making active sales of the Goods to purchasers situated in a country (the Restricted Territory) outside the country to which the Goods are supplied (the Territory) provided the Restricted Territory is outside the European Economic Area. If the Restricted Territory is within the European Economic Area, this restriction shall apply in those Restricted Territories within the European Economic Area which the Company has reserved to itself and/or one of its distributors, in its sole discretion. For these purposes, active sales shall be understood to mean actively approaching or soliciting purchasers, including, but not limited to, the following actions:

(a) visits;
(b) direct mail, including the sending of unsolicited emails;
(c) advertising in media, on the internet or other promotions, where such advertising or promotion is specifically targeted at purchasers outside the Territory;
(d) online advertisements addressed to purchasers outside of the Territory and other efforts to be found specifically by users outside the Territory, including the use of territory-based banners on third party websites and paying a search engine or online advertisement provider to have advertisements or higher search rankings displayed specifically to users outside the Territory (Online Advertisements); and
(e) advertising or promotional material in any form, or translations of the Customer's website into a language other than an official language of any country forming part of the Territory, that the Customer would not reasonably carry out but for the likelihood that it will reach purchasers outside the Territory.

6.4 Permitted active marketing and sales in Restricted Territories must be in the local language and currency.

6.5 The Customer shall refrain from making active sales of the Goods to online purchasers via third party websites which carry their own name and logo, including unions and market in places, such as Amazon, eBay and Alibaba.

7 GUARANTEES AND LIABILITY

7.1 The Company will have no liability to the Customer or any third party if the Customer does not comply in all respects with the Company's instructions in relation to the product.

7.2 If the Customer immediately notifies the Company, as soon as it becomes aware of any defect in the Goods which appears within one year of delivery, the Company will, at its option and in its sole discretion, either repair or replace any Goods found to be defective due to faulty manufacture or materials supplied by the Company.

7.3 Where a defect has been notified, the Customer will, if so requested by the Company, return the Goods to the Company at the Customer's expense. If the Company subsequently confirms that the returned Goods contain defects attributable to the Company, the reasonable costs of re-delivery incurred by the Customer will be refunded

7.4 All terms, conditions and warranties implied by law, trade use or otherwise (including but not limited to any warranties as to quality or fitness for purpose) are excluded to the extent permitted by law. The Customer, by entering the Contract, acknowledges that the only warranties are those given expressly by the Company in this Contract.

7.5 Under no circumstances will the Company have any liability to the Customer for any loss or damage (whether direct, indirect or consequential and whether in contract or in tort) except as expressly stated in this Contract. This shall not relieve the Company from its legal liability for death or personal injury which is due to the negligence of the Company

8 DEFAULT

8.1 If the Customer:
(a) commits a breach of contract, or
(b) fails to make a payment on the due date; or
(c) becomes insolvent or has a receiver appointed,

the Company shall be entitled either to suspend the supply of Goods or, at its option and in its sole discretion, to cancel this Contract and repossess any Goods for which payment has not been received in full.

8.2 The Company shall also have the rights set out above if it reasonably considers that any of the events mentioned (a), (b) or (c) above are likely to occur.

9 SEVERANCE

9.1 If any provision or part-provision of this Contract is or becomes invalid, illegal or unenforceable, it shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable.

9.2 If such modification is not possible, the relevant provision or part- provision shall be deemed deleted. Any modification to or deletion of a provision or part-provision under this clause shall not affect the validity and enforceability of the rest of this Contract.

10 DIVISIBILITY CLAUSE

10.1 This Contract is divisible. Each delivery made hereunder shall be deemed to arise from a separate contract and may be invoiced separately. Any invoice for a delivery shall be payable in full in accordance with terms of payment provided for herein, without reference to and notwithstanding any defect of default in delivery of any other instalment. All Goods offered by the Company are supplied expressly upon these terms with no additions or modifications

11 GENERAL

11.1 In this Contract, a Working Day shall mean a day other than a Saturday, Sunday or public holiday, on which clearing banks are open for non-automated commercial business in the City of London.

11.2 The Company has the right to sub-contract its obligations.

11.3 This Contract shall be governed by the laws of England and Wales and the laws of the United States of America depending on where the transaction has been made.

11.4 Any dispute between the parties shall be finally determined by the courts of England and Wales and the parties agree to submit to the jurisdiction of those courts or by the United States Judicial System based on location of transaction.

11.5 The price list is subject to printer's error. The Company disclaims any liability for typographical errors and omissions in this price list.

DISCOVER TOM DIXON

TOMDIXON.NET

The Tom Dixon website is the fastest, easiest way to see our full collection and all professional product information you need, including silhouettes, CAD files and BIM files. The website also has a host of tools and features. See our upholstered furniture in different coloured fabrics. Choose from our collection of pre-configured pendant systems. You can also be inspired and see our products in-situ by browsing our library of extraordinary spaces. The company account area provides all members with access to B2B features like quoting, quick ship order, and more.

TOMDIXON.PRESSCLOUD.COM

Our new Tom Dixon portal is an online platform from which trade and press can access our sales and marketing collateral. From lookbooks, price lists and catalogues to latest press releases and brand assets, the portal offers a wealth of information and thousands of products and spaces images.

ORDER TO DELIVERY SERVICE OFFERS

The Tom Dixon range is clearly structured into three service offers; Quick Ship, Collection and Tailor Made. Please inquire about stock availability for new products.

NEW

Furniture, Lighting & Accessories

- Please enquire for stock availability

QUICK SHIP

Furniture, Lighting & Accessories

- Best sellers
- Always available in our warehouse
- Immediate delivery
- Made-to-stock

MADE TO ORDER

Furniture

- Upholstery Furniture: Made-to-order
- 11 fabric and leather options in curated colours, typically delivered in 10 weeks. For accurate made to order lead times on specific upholstery, please contact customerservices@tomdixon.net or your trade services executive.
- For lead times on colours not included in the collection fabrics, please reach out to Customer Services or your Trade Services Executive.

GENERAL INFORMATION

These maintenance tips are purely recommendations and cannot guarantee 100% stain removal. Please consider the properties of the high quality natural material and ensure that appropriate care is taken to maintain the long lasting beauty of your product. For further details please contact your Sales Representative.

LIGHTING

Metallised Polycarbonate
Metallised polycarbonate products are only guaranteed against non-aggressive atmospheric conditions and therefore must only be stored and installed in temperature controlled environments to preserve the quality of the product. Clean with a soft dry cloth only. Do not use polishing agents, water or abrasive materials. Always switch off the electricity supply before cleaning.

We adhere to specific European Directives (such as "The Restriction of Hazardous Substances Directive"(RoHS) 2002/95/EC) and certain safety standards required by the international marketplace (British and European IEC standard, UL rating).

LED Care
When cleaning/servicing LED products, avoid touching LED chips and other exposed electrical components with bare hands. Direct contact can lead to increased wear and a shorter product lifespan.

Dimmability
Lighting stating the term dimmable, means it has compatibility tested and verified to work with a variety of common, mains voltage, off the shelf, LED (Trailing edge) and/or non-LED (Leading edge) dimmer switches.

Correct installation with other dimming and building management systems such as Dali, KNX, 1-10V, 0-10V will require separate advice from the specific systems expert.

Battery Care
Batteries are installed in portable lighting products. Use only the recommended charging cable and charger with a suitable input for the product. To extend battery life, it is not recommended to charge the battery while the light is in operation. Do not submerge the product in water.

Contact Tom Dixon authorised service points if you notice any battery abnormalities during use, including but not limited to deformation, venting, unusual noises, or if the battery compartment does not close securely. Stop using the product immediately and replace any damaged parts through Tom Dixon authorised service points, agents, or a similarly qualified person. Do not attempt to source rechargeable batteries off the shelf, as they are not certified for use with this lighting and will void the warranty.

Keep new and used batteries out of the reach of children and pets. Do not place battery-operated lighting on or near heat sources. Do not cover battery-operated lighting with fabrics or any flammable materials.

Do not ingest batteries — chemical burn hazard. If a battery is swallowed, it can cause severe internal burns within two hours and may lead to death. If you believe a battery has been swallowed or inserted into any part of the body, seek immediate medical attention.
The product must be disconnected from the power supply before removing or replacing the battery. To dispose of a lithium-ion battery safely, take it to an authorised battery recycling facility. When disposing of the battery, tape the terminals with non-conductive tape to prevent short-circuiting. The battery must be removed before disposing of or scrapping the product. Please refer to the instruction manual for guidance on removing the battery pack from each portable lighting product.

Storage of Outdoor Products
Always store products with an ingress protection rating of IP44 or lower indoors when not in use. It is recommended to store products with vibrant colours indoors to preserve their appearance, as pigments in polymeric materials can be sensitive to UV radiation, heat, and other environmental factors. To maintain colour quality, avoid storing the lamp in direct sunlight or near heat sources, as prolonged exposure may cause fading over time.

FURNITURE & UPHOLSTERY

General Care Advice
Avoid exposing products to excessive heat e.g. by placing in front of a radiator, as this can cause cracking. A minimum 30cm clearance from heat source is advised.

Cleaning and Maintenance
As with other items, dust settles on upholstered furniture. Dirt can also be caused by contact with dirty materials. Do not allow the dirt to become too excessive, otherwise it will be more difficult to remove. Upholstered furniture should be cleaned regularly to ensure prolonged life and appearance. Velours/velvets should be brushed with a soft brush and/or vacuumed with a clean brush nozzle, always in the direction of the nap. Take care not to spill liquids onto velvet, especially those with a viscose pile. It will cause staining or watermarks which are extremely difficult to remove.

Easy Maintenance & Touch-Ups
For instances of wear or accidental damage, touch-up pens are available in Black, Putty and Moss colors, helping your furniture product maintain its pristine appearance effortlessly.

Treatment of Pressure Marks
Creases and pressure marks may be caused due to incorrect handling and transportation, even though the textile is carefully packaged. This is normal and to be expected. Marking and/or pile distortion are typical characteristics of velours/velvets and are not an indication of poor wear. Movement or displacement of the pile is quite normal and should be expected, especially in areas of high use such as arms, seat fronts and back cushions. Due to the nature of velours/velvets, some areas of our products will show some pile distortion; this is due to the fluid and curved shapes of our products. Areas where the upholstery is pulled around edges or has piping may show some pile distortion. This is considered normal and not defective.

Most marks on velours/velvets can be removed by one of the following steps:

Brushing
To remove faint pressure marks/creases, brush the textile with a soft brush for the nap to rise to its original state.

Damp Cloth
Place a damp cloth on the textile or spray the affected areas with clean water until the textile's surface is moist but not wet. Brush the textile with a soft brush for the nap to rise to its original state. Let the textile dry over night or use a hair dryer from different directions to raise the nap.

Steaming
Gently steam the affected areas at a distance of 5-10cm. Take care not to drip hot water from the steamer on the textile as it can permanently damage the velour/velvet. Immediately after steaming, brush the textile with a soft brush for the nap to rise to its original state. You can repeat this process a few times on more severe marks/creases. Let the textile dry overnight or use a hair dryer on a gentle setting from different directions to raise the nap.

Sofas
For general maintenance, we recommend regularly straightening the fabric and aligning the seams with the edges of your sofa. Excess fabric can be smoothed between the edges of the modules.

FURNITURE

Marble
Marble is an exceptionally porous natural material and greater care must be taken with it. Avoid wine, oil based products and foods, vegetable and fruit dyes or acids coming into direct contact with the surface. Please be aware that Marble will have some natural occurring variations in colour and veins and fissures which will display the natural inherent behaviours of the material and are not covered by our returns policy. As a natural product, no two pieces will be exactly alike.

OUTDOOR FURNITURE

Cleaning
Clean using water and mild soap and a soft cloth or sponge; do not use abrasive detergents or sponges.

Caution
The chairs and stools have been designed to stack; stack carefully to avoid bumps and scratches. Avoid tipping chairs back on legs or standing on tables and chairs. Always lift rather than drag the furniture to prevent scratching. Do not allow water to accumulate. To avoid damaging the protective outdoor powder-coated finish, we recommend not to place sharp-edged objects directly onto the furniture and use placemats where possible. Avoid stacking chairs on tables. Promptly clean off bird droppings and any other potentially staining or corrosive liquid spills as these may affect the powder-coated finish.

Storage

CARE AND MAINTENANCE

To prolong the lifespan of the furniture, store in a dry, well-ventilated location when not in use (e.g., during winter) and ensure protection against knocks or anything that can scratch the finish.

UPHOLSTERY
Please the manufacturers' websites:
www.kvadrat.dk
www.romo.com
www.ca-mo.com
For own label fabrics please visit:
www.tomdixon.net

Boucle
Boucle is formed from varying sized loops to give the fabric it's impressive texture. The fabric is sensitive to damage from sharp tools, belts, jewellery and pets. Loops or loose threads can appear and can be pushed back in with a blunt object. Make sure never to pull or cut the thread.

Please professional dry clean only, using a mild process suitable for the speicific fabric composition.

Velvet
Velvet will acquire its unique appearance after some time due to usage and the natural humidity of the surroundings. Pressure marks, rolling stripes and smaller irregularities, which are inherent for the product, will disappear in a ventilated and relatively humid environment. Pressure marks/creases/dents are difficult to avoid, even if the textile is handled carefully & correctly. This is a typical property of velours/velvets and it is not considered a defect nor a sign of low quality. Velours/velvets are generally more sensitive to incorrect handling than flat-woven textiles.

Wool
Daily care and immediate stain removal will ensure that your wool upholstery will keep looking good for many years to come. It is normally sufficient to regularly vacuum and air furniture upholstered in wool fabric. However, it is a good idea to clean the wool fabric occasionally.
Use an approved wool shampoo and follow the instructions carefully. Take care never to saturate the wool fabric. Never use undiluted cleaning agents, bleaching agents, ammonia or soap intended for hard surfaces.

Leather
As a natural material, leather may develop creases over time.

ACCESSORIES

FOOD SAFE
Where appropriate accessories products are food safe tested to BS and EN standards, therefore generally suitable for worldwide use barring some country specific deviations. For all our items that are used with food, rinse with warm soapy water before use.

Metal
Where suitable we leave the metals un-lacquered allowing the material to develop a unique and rich patina through the natural process of oxidisation, which we believe enhances the beauty of the product. The rate at which a patina develops will vary according to how it is handled and the environmental factors such as humidity in the atmosphere. For all our items that are used with food, do not let the brass or copper form verdigris, which is formed when brass or copper undergoes long-term natural oxidisation or is exposed to acidic conditions over time. Verdigris is bright green in colour, and must be completely cleaned off before the item is used.

• Hand wash with warm soapy water. Do not use in a dishwasher or microwave.
• After use, rinse in warm water. Do not leave submerged in water.
• Never use abrasive cleaners or brushes that damage the surface.
• Dry with a soft cloth, inside and out.

Brass
Brass, similar to silver, will oxidise naturally in air over time. Humid conditions and moisture will accelerate the process of oxidisation. We believe the patina and ageing process adds beauty and richness to the product. Brass is a soft, malleable alloy metal and should always be treated with care. As the product is used, it will display marks such as scratches, tarnishing and dents; this is normal and to be expected. Salts and oils from skin may also mark the metal surface. The product has been polished and treated with a wax coat to protect from marks and moisture during the transit and installation process. This treatment will over some protection against fingerprints and certain liquid spills in the first few weeks of use. Any spills or marks should be immediately cleaned, as per the instructions supplied with the product. The wax coat will disappear over time, allowing the brass to patina naturally with use, as is the intention. Please contact Customer Services for more information on how to care for your Mass product.

Copper
Copper will develop a natural patina as it oxidises, we believe that this enhances the beauty of the product as it is the nature of the material. If you do not want your product to have a patina finish, you may wish to use a metal polish. However, please be aware that this will alter the original finish of the product.

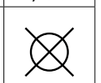
Stone and Marble
As a natural material, each piece will be unique and may have a small degree of colour variation and pitting. Grey is the most common variation for white marble but there may also be yellow, brown and green tones. Green marble varies from light to dark tones, with brown, black and various other coloured streaks visible. Black marble commonly has grey and white tones within it. All our marble items are handmade and variations will occur from piece to piece. Commercially available stone cleaners or baking soda may be used to remove stains from the marble. If using stone cleaner, follow the manufacturer's instructions carefully.

All stone has a degree of porosity therefore strong colours will stain such as beetroot, turmeric and red wine etc. High acidity fruits such as lemon and lime should not be left for any length of time on any stone surface as the acid will eat into the surface of the marble and may leave an indentation.

Hand-wash in warm soapy water.
Never use abrasive cleaners or brushes as this will damage the surface.
Do not leave submerged in water for extended periods of time.

Glass
Many of our glass products are mouth blown into our specifically designed moulds, and finished by hand.
- Wipe with a soft, damp cloth.
- Do not use abrasive cleaners, as these will damage the surface.

TEXTILES

Do Not Wash	Do Not Bleach	Do Not Tumble Dry	Do Not Iron	Dry Clean Only	Do Not Dry Clean
					


GENERAL
Small variations in colour and size are likely in hand made textiles. The dyes used in some natural materials may transfer to lighter colours; avoid contact with light surfaces or fabrics.
We recommend our textiles to be spot or professionally cleaned, please refer to the instructions on the product label for further information.

RUGS

GENERAL CARE
- We recommend the use of an anti-slip rug pad for protection and comfort.
- For rugs with a pile, some initial shedding will occur but will subside with regular vacuuming on a low power setting. In order not to pull up the pile of the rug avoid high suction cleaners.
- Loose threads can be removed by cutting, do not pull.
- Avoid exposure to moisture. Spills should be removed immediately; blot with a clean, undyed cloth, do not scrub.
- Avoid direct and continuous exposure to sunlight to reduce sun discolouration. We recommend rotating covered areas regularly so that wear is even across the entire surface.

JUTE CARE
Jute is a natural material with inherent shade and textural variances.
To avoid mould and mildew, keep it dry and do not clean with water. If a jute textile gets wet, remove it from the source of moisture immediately and place in a well-ventilated area to dry.

SUSTAINABILITY

Tom Dixon is working to create a better future for people and planet. Sustainability to us means our entire approach to our business and to the earth. Our spaces, the materials we use, how we move products around the globe, and the craftspeople we work with all determine our commitment to responsible business and minimising impact.

THE EARTH

We have set environmental and social policies in line with the UN sustainable developments goals (SDGs), a global framework to achieve a better and more sustainable future for all. There are 17 goals addressing global challenges such as poverty, climate change, peace and justice.

LONGEVITY

Our dedication to delivering products that stand the test of time means longevity is woven into our foundations. The products in our range today are intended to be enjoyed by generations to come.

CRAFTSMANSHIP

It is important to us that we celebrate the local traditions of the communities where our products are manufactured. We want our community to enjoy the beauty of craft, engineering and storytelling which underpins all our products – it's why we do what we do.

DESIGN

Sustainability is a key part of all design briefs for new products, to make sure they are not only engineered to be robust and suitable for every-day use, but also to transcend trends and stand as the antithesis of throw-away culture.

MATERIAL

We evaluate the source and impact of the materials used to make our products and packaging and we seek opportunities to operate circularity before our products reach the consumer. We are continuously working to reduce and eliminate harmful substances in the products we sell.

PACKAGING

Since 2019 we have been upgrading and removing unnecessary packaging from all our product and have transitioned from coated packaging to a kraft packaging solution which is 100% recyclable. We are continuously working to remove excess plastic from our packaging.

SUPPLY CHAIN

Tom Dixon has long-lasting partnerships with suppliers who align with our brand values. We have clear policies laid out in our supplier manual, demanding the highest level of integrity and transparency from all our suppliers. Social and ethical responsibility throughout our entire supply chain is important to us. As a SEDEX member, we commit to ensuring our key suppliers are SEDEX or equivalent audited and compliant.

Transportation is a key challenge to reducing the carbon footprint in a product business, but we continuously seek ways to reduce carbon emissions and seek greener alternatives to fuel our global business.

SERVICABLE

We design our products to be serviceable with replaceable parts and are working on upgrading products to incorporate serviceability across the range.

CERTIFICATION

It's important to us that our products meet industry recognised environmental standards. Initiatives we are working towards on selected products include:

FSC (trademark licence pending)
VOC (low-emitting materials qualification for BREEAM, WELL and LEED)
Environmental Product Declarations
